France riots expose radical left-Islamist nexus, deepening political crisis ahead of 2027 presidential election

French nationalist politician Eric Zemmour has warned that France is increasingly divided between its traditional European, Christian identity and a growing population he describes as predominantly African, Arab and Muslim, predicting that the clash between these competing visions will shape the 2027 presidential election

Oppgradert E105 mellom Kirkenes og Murmansk åpnet

Pressemelding | Dato: 29.09.2017

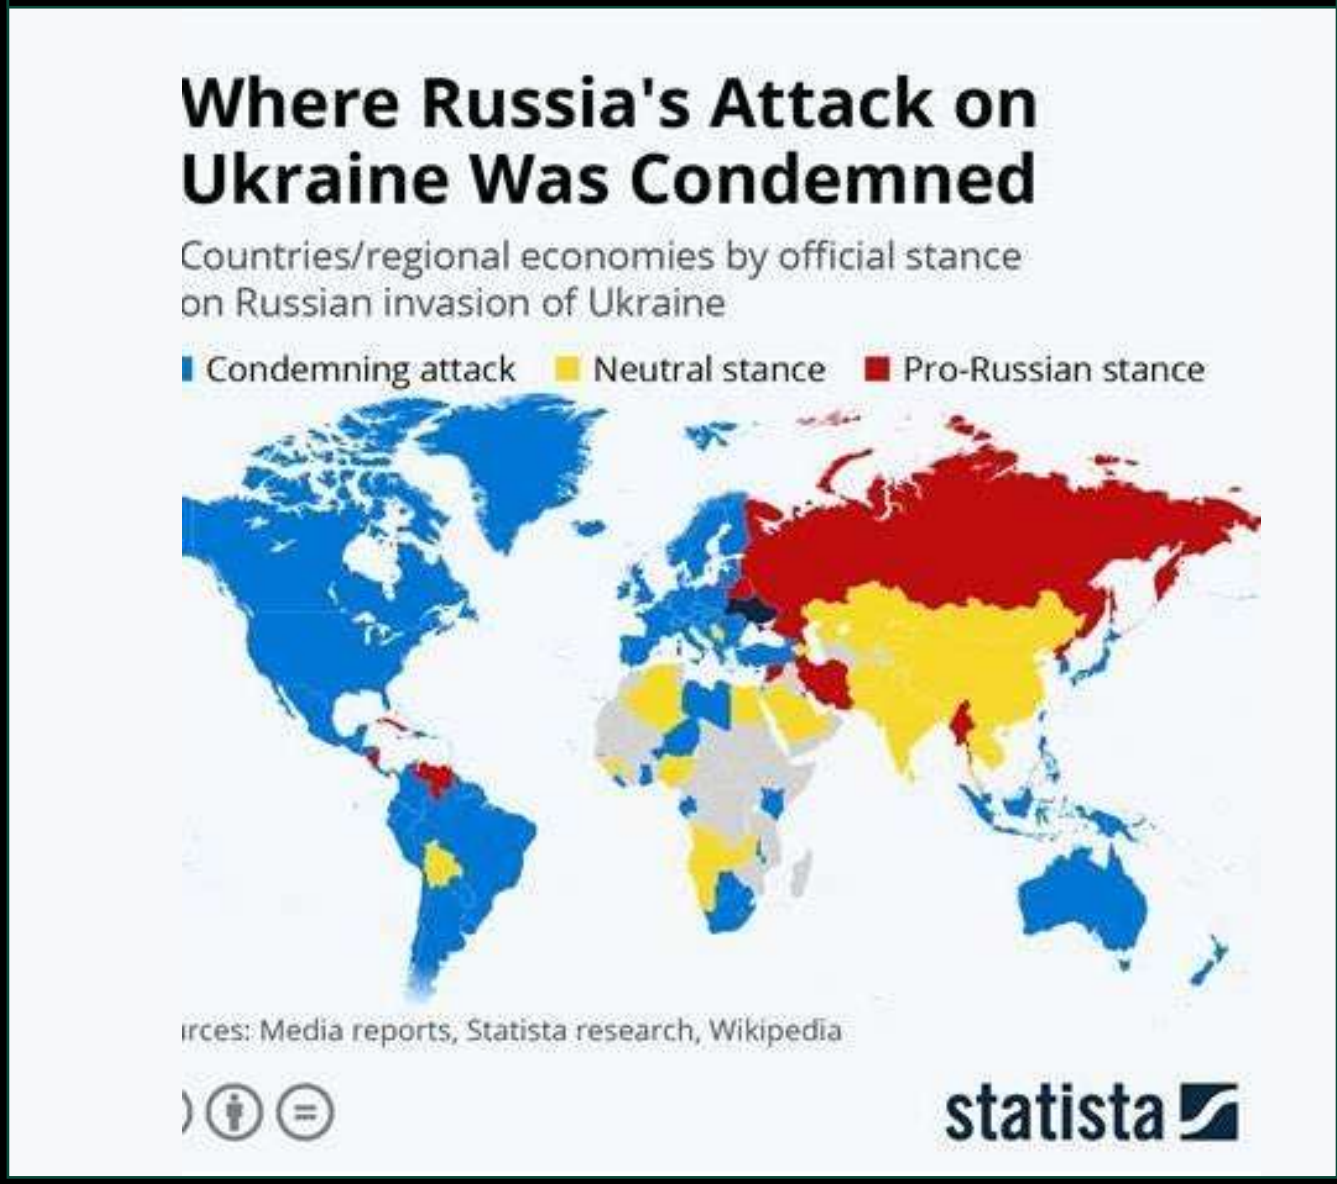

I dag åpnet Russlands visetransportminister Sergej Aristov og samferdselsminister Ketil Solvik-Olsen oppgradert E105 mellom Kirkenes og Murmansk. Prosjektet er et resultat av samarbeid mellom veimyndighetene fra begge land over flere tiår og er et konkret uttrykk for nordområdesatsing og brubygging mellom naboene i grenseområdet.

Fra venstre: Samferdselsminister Ketil Solvik-Olsen, ordfører i Sør-Varanger kommune Rune Rafaelsen, regionvegsjef Torbjørn Naimak, nestleder i det

Shale Oil & Gas LNG Renewables

Auditors say EU's Russian Energy Exit is failing

September 9, 2026

Auditors said that the EU's efforts to be independent of Russian oil and gas are faltering as it heads into winter with unusually low stocks.

The European?Court of Auditors stated?in a recent report that?the?EU?is not investing enough in order to achieve its aims of replacing Russian energy by diversified fossil fuels and expanding renewable energy, grid infrastructure and increasing energy flows between EU member states over the next several years.

Since the full-scale Russian invasion of Ukraine in 2022, the European Union has gradually phased out Russian fuel imports.

The EU has eliminated nearly all Russian crude oil imports due to sanctions on seaborne Russian oils. It now imports 12% of its natural gas from Russia. This is down from 45% in 2022.

The auditors noted that the EU's plan to stop using Russian energy is "failing just at the time when Europe's energy security faces renewed threats? from the turmoil in the Middle East".

Europe struggles to fill its gas storage before winter as the Iran War squeezes global supply. Gas Infrastructure Europe's data show that EU gas caverns have only 67% of their capacity filled, a far cry from the 80% reached at this time last season.

Analysts warn that this could lead to price spikes in winter, especially as the EU's Russian Gas phaseout will ban all Russian LNG imports on January 1, 2027.

Auditors said that the EU replaced Russian gas in part due to mild weather conditions and high energy prices, which reduced demand. They did not attribute this to policy. The auditors recommended that Brussels intervened more to ensure that countries "stay on track" with the Russian withdrawal.

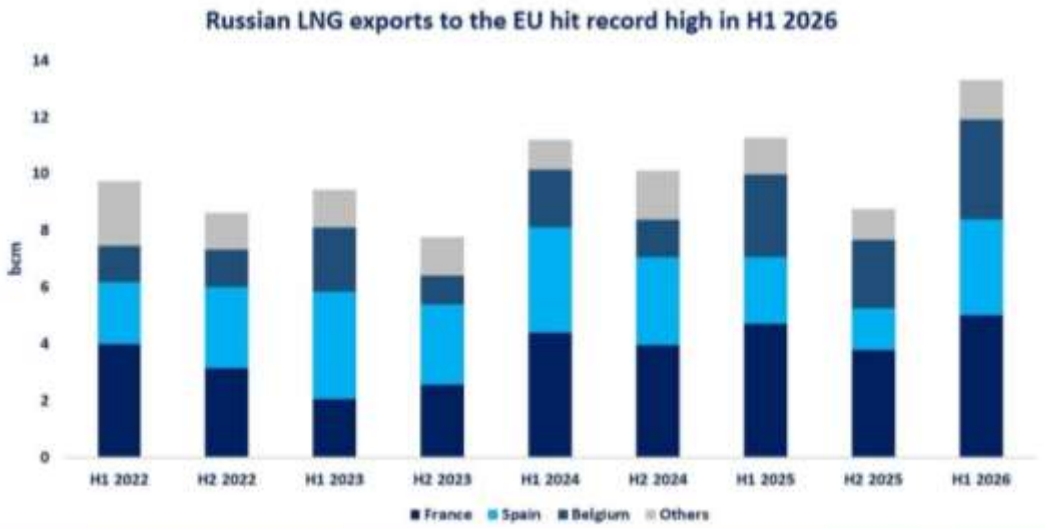

A spokesperson for the European Commission said that EU funding and actions had helped accelerate renewable energy projects and led to a dramatic

Gas Prices

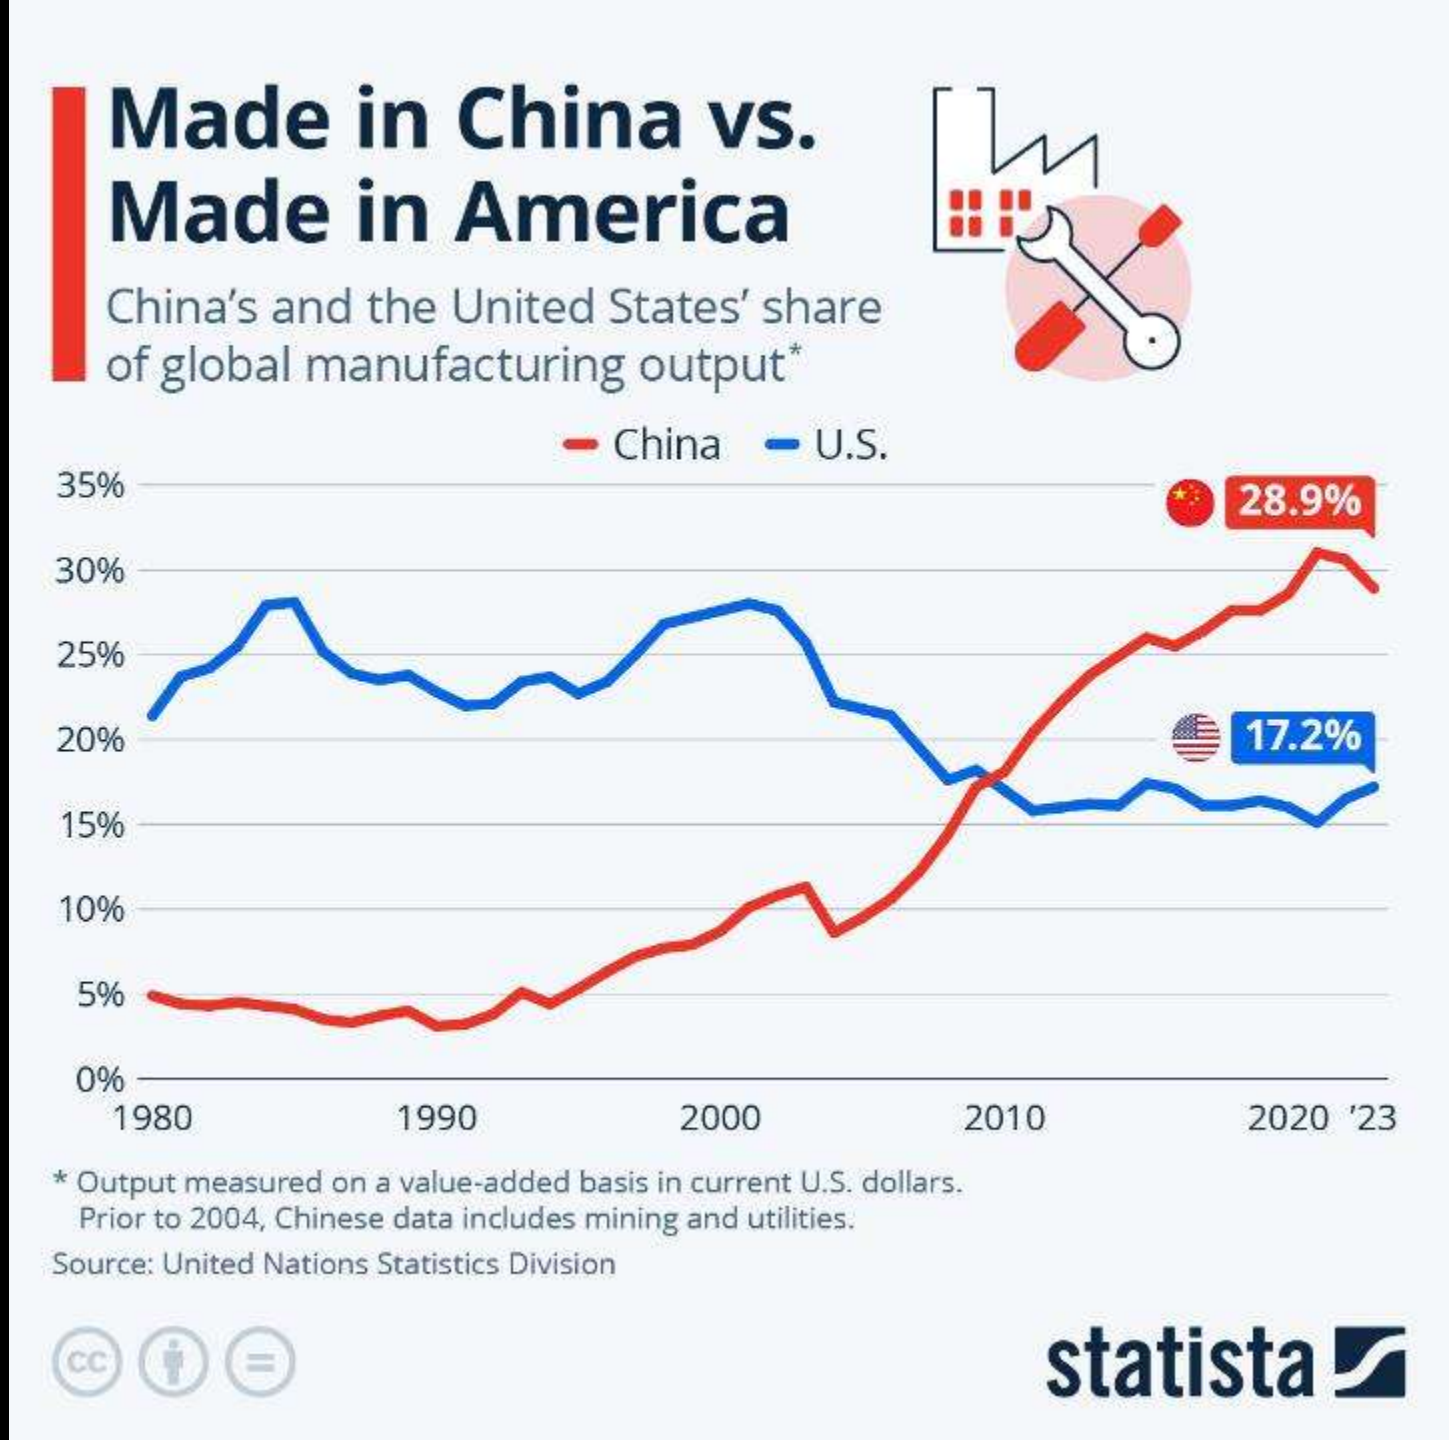

TTF prices surge as European gas market tightens

David Callanan September 2, 2026

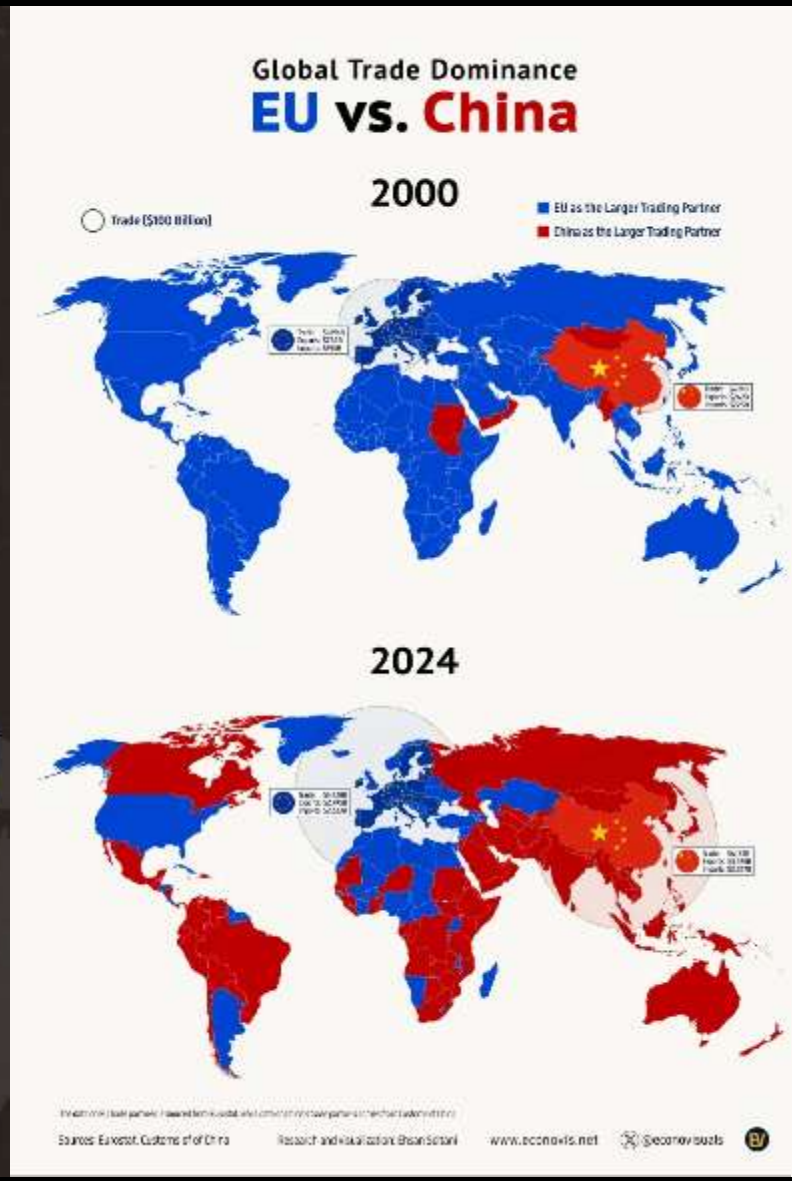

TTF prices surged in August as tighter global LNG supply, stronger European gas demand and Norwegian outages combined to put renewed upward pressure on the market. The increase came as gas prices across Europe and Asia climbed to their highest levels since the start of the Hormuz crisis.

European car industry in crisis: Falling sales and competition from China

by enr with AFP, ANSA, BTA, CTK, dpa, EFE, LUSA, STA | 02 Oct 2024 | Key Stories

Slowing the production of cars with internal combustion engines down and at the same time drive the production of cars with electric engines forward – these are the goals set by the European Union and its member states. Despite subsidies for EVs introduced in some countries, sales of electric cars are crashing and the European car market is plunging into crisis.

Kjører for «halv maskin»: Europeisk bilindustri kan miste åtte fabrikker

13.10.2025

NYHETER NOTISER

Svakt bilsalg og økende konkurranse fra kinesiske merker som BYD kan tvinge europeiske bilprodusenter til å stenge opptil åtte fabrikker, ifølge en analyse fra AlixPartners.

Bilfabrikker i Europa utnytter i snitt bare 55 prosent av kapasiteten, noe som svekker lønnsomheten. **Stellantis** pekes ut som mest utsatt, med bare 45 prosent kapasitetsutnyttelse.

Konsulentene anslår at kinesiske bilmerker vil ta 1–2 millioner biler fra europeiske produsenter de neste årene, og nå omtrent fem prosent markedsandel i år.

En studie fra Jefferies tror andelen kan stige til ti prosent innen 2030, drevet av produsenter som **BYD** og **Chery**, som bygger fabrikker i Europa.

25. mai 2023 kl. 05:47

Skip har grunnstøtt i Suezkanalen

Et lasteskip gikk tidlig torsdag morgen på grunn i Suezkanalen. Hendelsen fører til forsinkelser i kanalen som går mellom Middelhavet og Rødehavet.

Det er det Hongkong-registrerte bulkskipet Xin Hai Tong-23, som har gått på grunn, opplyser egyptiske havnemyndigheter.

Skipet er 190 meter langt og 32,3 meter bredt.

Suezkanalen er på sin side 190 km lang, 24 meter dyp og rundt 205 meter bred. Den forbinder Middelhavet med Rødehavet, og er den raskeste ruten mellom Europa og Asia via sjøveien.

Flere tauebåter forsøker nå å få skipet av grunn, ifølge Reuters.
